

Reference letter for Mario FERKETIĆ

Mario has shown great capacity to offer solutions to complex problems. Yet still young, but also full of desire to learn and adapt. In my company Marx Blue, he has worked on many projects, including Android and iOS apps, websites and also many other technologies and platforms, per needs of the company's clients. He has demonstrated responsible and timely execution of tasks and has shown an urge to think out of the box. He still has stuff to learn, but I hope that my sincere recommendation will offer him more opportunities to evolve and prosper. As someone who has collaborated with him, I felt like I could rely on him for execution, and also for research and price negotiation with clients. I would like to highly recommend this young man for any software programming positions in any good company.
